1.	Thu, 5/10/07 2:11 PM	Try to keep the meetings in downtown area. I have a long enough drive as it is. I know we are a bit outnumbered on this with all the landmen that work and live in S. Tulsa - but I thought I would just pass it on.
2.	Thu, 5/10/07 2:50 PM	NGL is BS, we are all Land professionals regardless of age. If any thing, we should have a Masters group that restricts the youngsters who have not put in their time. 1. TAPL should avoid Christmas Dinners like the one this past December; the Gilcrease event was much more appealing to TAPL members; 2. Educational events are about right. However, the Energy Forum may be too much for TAPL to take on and be successful unless done together with OCAPL. Consider a Forum on the Oklahoma Corporation Commission with recommendations to improve its processes for spacing, pooling etc.; 3. Summer weekend activities (ex. - picnics); 4. TAPL needs to actively take the lead and lobby for/against legislation that involves landmen. Recommend the formation of a Task Force that would pursue legislative changes to the terms of the O&G leases issued by the Commissioners of the Land Office. Currently, these leases contain a Pugh Clause that requires that you release all non-producing formations at the end of the primary term, not just those below the deepest depth penetrated. Oklahoma's landmen had better start being pro-active in developing allies in the Legislature or else the lawyers and politicians are going to start running all over us like they have tried to do in Texas and other states.
3.	Thu, 5/10/07 3:36 PM	
4.	Thu, 5/10/07 4:05 PM	Question 9 - I get more than what is listed already, i.e., newsletters and the directory - which I use constantly. Having on-line updates will be even better. Question 8 - I like having the "regular" meetings there but am open to having other venues as needed.
5.	Thu, 5/10/07 4:09 PM	Now that the University of Tulsa will have its own Energy Management Degree beginning this Fall, the TAPL must support its students and offer scholarships to the U. of Tulsa students and should support a mentoring program similar to the program at OU. The new board president should begin ways to implement this w/Ted Jacobs ASAP so it can become a successful program for our city and

University. We have always supported OU because it was the only program so now our association must support Tulsa's own.

6. Thu, 5/10/07 8:14 PM
I think NGL is unnecessary. Better the NGL's participate in the demographics of the industry as a whole. The older landmen can learn from the NGL's also. Signed, LGL (thought to be the "Last Generation of Landmen")
7. Tue, 5/15/07 5:43 PM
While I am a PLMer, I think scholarships could go to anyone wanting to do land or landman work such as law school students and other general business students, or any kid of a TAPL member who wanted and needed one for other oil and gas related careers including geological, etc.
8. Wed, 5/16/07 3:02 PM
Post pictures of TAPL events (meetings, seminars, golf tournaments) on website.
9. Thu, 5/17/07 2:12 PM
The "T" in TAPL does stand for Tulsa, so I believe scholarship awards should have Tulsa ties. In the same light, the TAPL should do what it can to support TU's new program. Also, you should encourage new blood/turnover on the board. One way of doing that would be to discourage the same members from running over and over and over again. Overall, I think you are doing a good job.
10. Thu, 5/17/07 2:58 PM
THE GOLF TOURNAMENT AT ISCC WAS FANTASTIC. MY ONLY DISAPPOINTMENT WAS THAT WE DID NOT HAVE A PHOTOGRAPHER FOR TEAM PHOTOS. I HAVE A WALL FULL OF MEMORIES FROM YEARS PAST.
11. Thu, 5/17/07 3:01 PM
Meetings should be held during the week in lieu of Monday.
12. Thu, 5/17/07 3:07 PM
#14: Ties to Tulsa could be a preference option. Awards need to go to deserving students, whether or not they are from Tulsa, under the criteria TAPL has in place.
13. Thu, 5/17/07 3:11 PM
Possibly, the TAPL could telecast some of the Educational events held in Houston and other venues in order to help with continuing education if a local sponsoring company has the capability and is willing to do so. I see no rationale or benefit for the Next Generation Landman Group to exist, at all, either on a TAPL basis or an AAPL basis and have yet to hear a compelling argument to support the group.

14. Thu, 5/17/07 3:24 PM I don't understand what you're saying/asking on number 12. I would not agree that funds should be spent on an event/function that would not be of interest to the entire membership of TAPL.
15. Thu, 5/17/07 3:33 PM 13 & 14. Scholarships should favor Energy and Land Majors at Oklahoma Schools who plan to become part of this industry. However, we may have other industry majors or schools worth consideration due to Tulsa or Member ties which the Board may wish to consider. Tulsa ties should carry some weight, but also not be a specific requirement. The Board and its appointed Committee Chairmen represent the membership in these situations and always try to be consistent and logical in plans and decisions. Events: Most of us are not as young or party hardy as we were back in the last boom and therefore a lot of the members don't have much appreciation for the basic dinner, drinks and dancing agenda. But quality, class, events like dinner social & art at Gilcrease some other similar class event should be pursued once a year (not necessarily at Christmas). Educational Events are part of building and making the TAPL an outstanding professional organization servicing the needs and wishes of its members and the industry. Its growth and impact is limited only by the number of volunteers, committee members and board members who are willing to provide the creative ideas and work to make them happen for the organization and membership.
16. Thu, 5/17/07 4:05 PM Thanks for another successful year...
17. Thu, 5/17/07 4:47 PM I would like to see TAPL occasionally secure speakers from outside our industry to discuss various topics from outside our industry. Also, I think TAPL could get more creative with our educational and other events. For instance, I'm aware of another organization that hosted a seminar at a facility at a baseball stadium and had a networking event at the baseball game that evening where family could attend. A nice lunch/speaker at something like Philbrook might be an interesting change....just some ideas. NGL is really not a big deal one way or another, but I think TAPL could try to keep younger landmen in mind when scheduling educational events.
18. Thu, 5/17/07 7:31 PM As I am located in McAlester, it is very difficult at this busy time within the industry to associate as often as I would like to, but I have always thought the board and

committees that represent my interests in the TAPL and industry are doing and have done an excellent job. I am proud to be associated with this group. Keep up the excellent work.

19. Thu, 5/17/07 7:38 PM Good Job!
20. Wed, 5/30/07 3:22 PM I do not play in the spring golf tournament due to the six man scramble format. I prefer morning and afternoon rounds held at meadow brook or limit the number of participants.
21. Wed, 5/30/07 3:28 PM An official committee comprised of only NGL would be counterproductive. In my opinion, NGL should be encouraged to participate in established committees in TAPL. This will help with their networking and give them broader view of the industry.
22. Wed, 5/30/07 3:28 PM You cannot be all things to all people. Providing Social and Educational opportunities in my opinion are paramount. Landmen make "deals" and those spring from our contacts. You divide us up in little groups and you lose your value. That and \$2 will get you a coffee at Starbucks.
23. Wed, 5/30/07 3:33 PM Being fairly new to the TAPL organization and Tulsa, does TAPL sponsor any local fund raising events to benefit non-profits or poverty level families in the Tulsa area?
24. Wed, 5/30/07 3:47 PM You're doing a great job!
25. Wed, 5/30/07 3:50 PM You have a hard job; keep trying. If nothing new came out of TAPL I would say you guys are doing a more than adequate job. However, any new things that you try are the only way to test the waters. Keep it up.
26. Wed, 5/30/07 4:10 PM Great job this year, Keep it up for 2008
27. Wed, 5/30/07 4:39 PM I would like to see more local classes/seminars for basic land skills, i.e. division orders, leasing, poolings, spacing, etc.
28. Wed, 5/30/07 4:56 PM Thanks for offering this survey. It is a useful tool to get some additional member input.
29. Wed, 5/30/07 6:00 PM An event for young landmen would be great or even a co-sponsored event for young landmen in OCAPL and TAPL.
30. Wed, 5/30/07 6:35 PM I would like to become more involved on a committee
31. Wed, 5/30/07 6:36 PM As an "out of town" member, I don't think my opinions are

really crucial to your results. We seldom are able to attend functions in Tulsa, especially luncheons, but we did enjoy the summer meeting at the Gilcrease museum.

32. Wed, 5/30/07 7:55 PM Number 3 is really should not have be together. They require two different responses. I don't rely on TAPL for continuing education, however, I do try to attend their meetings and events.
33. Wed, 5/30/07 8:07 PM I think the fall tournament should rotate between TCC and Cedar Ridge to allow all played to play @ the premier clubs of Tulsa.
34. Wed, 5/30/07 8:16 PM Scholarships should only go to members immediate kids.
35. Thu, 5/31/07 3:13 AM I don't think the Christmas Party is a good event for the organization in the form that it was this year.
36. Thu, 5/31/07 12:43 PM Question 13 is not clear as to what other students might be given scholarships. It seems to imply any profession, which most members would likely be against, but I suspect the intent was to extend the field of potential recipients to include other land related professions or graduate work like legal studies, MBAs, etc. Accordingly I would not take your responses on Q.13 as determinative.
37. Mon, 6/4/07 3:06 PM I wonder why the younger landmen feel that they need a separate organization like the NGL. I feel they would learn more from older, more experienced landmen than people with about the same experience level as themselves.
38. Fri, 6/8/07 6:59 PM I'd like to see more "business centric" educational events. By business centric I mean more deal and opportunity oriented. Larger companies may not care about this b/c their landmen have a more narrow focus, however, many of your members (myself included) wear a lot of hats in their respective companies and engage in much more than just land based activities. We are responsible on a much more macro basis and help to provide vision for our companies.
