TULSA
Association of Petroleum Landmen

Letter From the President

Dear TAPL members:

For the first time in recent memory the Fall TAPL Golf Tournament was blessed by gorgeous weather. Light winds, no clouds, highs in the upper 70s and an immaculately beautiful golf course, Cedar Ridge made this event one to remember. A great round followed by another great steak dinner prepared by the Cedar Ridge staff made this truly a golf tournament to remember. And it wasn't just all fun and games, our membership was able to raise a significant amount of money for the TU and OU Energy Management Endowment Funds. Thanks to Harriet Connolly and her entire team on the Events Committee for pulling off another amazing event.

Staying on the success train, our first Educational Luncheon of the year was a record breaking success. Bob McNulty packed the house with over 50 attendees to hear his talk on OCC Horizontal Drilling and Spacing Units. These events usually draw around 20 members so to more than double average attendance was quite a feat. Special thanks to our Educational Committee Chair Wink Kopczynski for scheduling this great event.

Brien Thorstenberg with the Tulsa Regional Chamber will be our speaker at our next dinner meeting on November 9th. Brien is the Senior Vice President for Economic Development and will be giving talk titled "The Future Role of the Energy Industry in the Tulsa Region". I think all our members will agree this is certainly an interesting topic and I look forward to hearing the Chamber's view on the subject. Please remember AAPL credits are available for those who attend the dinner.

We have plenty of other events coming up between now and the end of the year, both TAPL and AAPL sponsored, so please check the calendar in this newsletter or on our website for more information. Most events offer some AAPL credits but all of them provide excellent networking and educational opportunities.

Hope to see you all at our November 9th Dinner Meeting

Sincerely,

Steve McNamara, Jr.

TAPL President

FALL GOLF TOURNAMENT

EVENT WRAP-UP

Thank you to all the members that came out to play in the 2015 TAPL Fall Shamble Monday, October 12th. It was about time that we FINALLY had great weather! A big thank you to Cedar Ridge Country Club and all of the wonderful volunteers for helping us put on an awesome tournament. And of course, as always, we could not have done it without our very generous sponsors, so we thank you very much! Everyone mark your calendars for Monday May 9th for our Spring Scramble that will be held at Indian Springs Country Club. I look forward to seeing you all out there!

Sincerely,

Harriet Connolly, RPL

TAPL Events Director

ETHICS 360

TULSA, OK

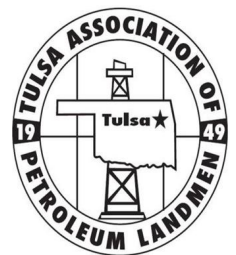

This course offering is specifically designed to enhance and elevate members' awareness of the importance, the implications and the opportunities Ethics present for the Land profession. It underscores the AAPL's continuing commitment to Ethics and reinforces our viewpoint, values and vision to members and the public alike.

Speaker:	Rob Shultz, CPL
Event:	Ethics 360
Hotel:	Embassy Suites Tulsa, 3332 S 79th E Ave., Tulsa, OK 74145
Date/Time:	Friday, November 6, 2015 8:00am—12:30pm
Cost:	\$250 for members, \$375 for non-members
Class Capacity:	100
Accreditation:	4 CPL/RPL/RL Ethics credits

[CLICK HERE TO REGISTER](#)

Rob Shultz, CPL graduated from the University of Texas in 1973 and worked briefly for the Heritage Foundation in Washington, D.C before joining Exxon Co. USA in 1979 as a roustabout in West Texas. Over the next 34 years, Rob filled various professional and supervisory roles for both Exxon and ExxonMobil in Houston, Los Angeles, Tyler and Dallas, Texas. For his last three years before retiring in March 2013, he served as Professional Development Advisor to about 200 ExxonMobil Commercial and Land employees globally. Rob has been involved with real estate and real property interests essentially his entire career. He's been a certified ethics instructor with the International Right of Way Association, and is a longtime member of the AAPL. Rob and his wife Cindy have four children, two granddaughters and make their home in Tyler, Texas.

DINNER MEETING

NOVEMBER

<u>Date/Time:</u>	Monday, November 9, 2015
<u>Check-in:</u>	5:00pm, Summit Club – 30 th Floor
<u>Cocktails:</u>	5:00-6:00pm, The Summit Club – 31 st Floor
<u>Dinner:</u>	6:00pm, The Summit Club – 30 th Floor
<u>RSVP:</u>	CLICK HERE (Deadline: NOON, Friday, November 6)
<u>Guest Speaker:</u>	Brien Thorstenberg – “The Future Role of the Energy Industry in the Tulsa Region”

Speaker Brien Thorstenberg, Senior Vice President for Economic Development, Tulsa Regional Chamber

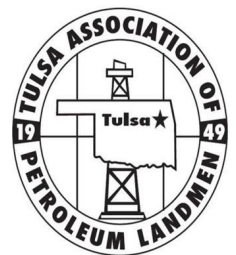

Brien Thorstenberg is the Senior Vice President for Economic Development for the Tulsa Regional Chamber. In this capacity, he leads a professional team of economic development professionals to direct the economic development effort for the Tulsa region. Brien's career with the Tulsa Regional Chamber began in May 2013 when he was named the Vice President of Economic Development. In this role, he was responsible for the business attraction and retention division of the economic development department.

Brien's career in economic development began with 4 years of experience in manufacturing extension with the Oklahoma Manufacturing Alliance and the Ardmore Development Authority. He was promoted to Vice President of Development of the Ardmore Development Authority where he served for 9 years.

Brien also served as Director of Business and Economic Development for the Muskogee City/County Port Authority from February 2012 to May 2013. In this role, Brien directed the economic development efforts for the City and County of Muskogee. At the Tulsa Regional Chamber, Brien led the recruiting effort for the Macy's Order Fulfillment Center which announced in December 2013. Macy's will open a 1.3 million square foot facility in the spring of 2015 employing 1500 full time and part time employees, with an additional 1500 seasonal employees.

Brien received a B.S. in Business Administration with a double major in Management and Economics from Oklahoma State University. He also received an M.B.A. from Southeastern Oklahoma State University with a concentration in Management, and is a graduate of the University of Oklahoma Economic Development Institute. He has also received his Certified Economic Developer Certification (CEd) from the International Economic Development Council. In his role as an economic development practitioner, Brien has served on numerous economic development related boards including the Chair of the Oklahoma Economic Development Council, the Chair Elect of the Tulsa Area Partnership, President of the Oklahoma Southeast (a regional economic development coalition), Executive Committee of the Oklahoma Governor's Economic Development Marketing Team and the Southern Oklahoma Workforce Investment Board.

Brien and his wife Glenna are both natives of Ponca City, OK. They live in Bixby with their two daughters, Lauren (12) and Alison (9).

SEA COMMITTEE

NOVEMBER UPDATE

TAPL Members,

Although the wind may have imparted less than savvy playing conditions during the 2015 TAPL Fall Golf Tournament, such was of no consequence with regards to the charitable nature of our members. In conjunction with the gratuitous donation of prizes, the TAPL Scholarship, Endowment and Awards Committee was able to coordinate a raffle at this year's tournament, where over \$3,100 was raised for the OU/TU Scholarship Endowment Fund. The SEA Committee would like to extend our most sincere thanks to all of those members that not only participated in the raffle, but to those that made an outright donation as well. In the near future, we look forward to holding similar fundraising opportunities for those that wish to contribute to the education of tomorrow's land professionals.

On a similar note, the University of Tulsa's Energy Management Program held their 5th Annual Scholarship and Awards Banquet. This event is orchestrated to recognize both donor organizations and scholarship recipients. Several SEA Committee members were in attendance to witness each of the three (3) TAPL Scholars officially receive their \$2000 scholarship award. With regards to this year's scholarships recipients from both TU and OU, the SEA Committee has found that these students are absolutely deserving of such an award, as they have shown to encompass the same high standards of our members and have exhibited an exceptional work ethic that is imperative to accomplishing their academic goals and beyond. We truly hope that one day we will see these same students become members of TAPL and in turn continue our members' legacy of "paying it forward".

SEA COMMITTEE

NOVEMBER UPDATE (CONT.)

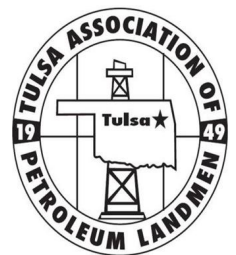

(Pictured above are TU TAPL 2015-2016 Scholarship recipients Dillon Eden and Ryan Lane. Not pictured: Kelsi Henriques)

In the meantime, the SEA Committee would like to kindly encourage all members to make a donation to the Scholarship Endowment funds and we appreciate any consideration put forth in doing so. For those looking to elevate their charitable efforts, you are hereby challenged to become a Century Club member. As many members are now aware, the mission of TAPL's Century Club is to recognize those who make such generous donations, as well as honor those that have been loyal, outstanding members for many years. By way of exclusive induction, the Century Club is comprised of distinguished members and member companies that have gone above and beyond by making a \$100.00 donation to the Scholarship Endowment fund for every year they have been a member with the TAPL, or for those companies that give over \$10,000.00 to the Scholarship Endowment fund. If you or your company would like to become a member of the TAPL Century Club or make a general donation to the Endowments, please contact Marlana Mafille (marlanam@kfoc.net, (918) 491-4417) for more information.

Also, we will be collecting nominations for both AAPL and TAPL Awards over the next several months, so if you have a TAPL member you would like to nominate for Landman of the Year, Rookie of the Year, or the Lifetime Achievement Award, please submit your nominations to Ben Brown at benbrown@cox.net.

Thank you,
Marlana Mafille, RPL
TAPL Scholarship, Endowment & Awards Committee Vice Chair

DOMESTIC NEWS

U.S. Oil Drillers Slow Pace of Rig Cuts: Baker Hughes

By: SCOTT DISAVINO, October 23, 2015

REUTERS - U.S. energy firms reduced oil rigs for an eighth week in a row this week but slowed the rate of those cuts to just one rig, data showed on Friday, a sign some drillers may soon return to the well pad with hopes of rising crude prices in the future.

The total rig count for the week ended Oct. 23 fell to 594, the least since July 2010. Over the past eight weeks, drillers cut a total of 81 rigs, oil services company Baker Hughes Inc said in its closely followed report.

The reduction this week was the lowest since drillers started cutting rigs at the start of September after adding 47 rigs over the summer. Drillers decided to add the rigs over the summer during the spring when crude prices averaged \$60 a barrel in May and June.

U.S. oil futures this week however have lost over 5 percent to average \$45 a barrel, sliding for a second straight week, on continuing oversupply concerns even as China's latest interest rate cut raised hopes for stronger demand from the world's top energy consumer.

The total count this week is less than half the 1,595 oil rigs in the same week a year ago. Since hitting an all-time high of 1,609 in October 2014, weekly rig count reductions have averaged 19.

With natural gas rigs up one to 193 this week, the total oil and gas rig count held at a 13-year low, according to Baker Hughes.

The rig count is one of several indicators traders look at in trying to figure out whether production will rise or fall over the next several months. Other factors include how fast energy firms complete previously drilled but unfinished wells and rising well efficiency and productivity.

Despite the overall decline in oil rigs, drillers added rigs in two of the four major U.S. shale oil basins this week. They added three in the Niobrara in Colorado and Wyoming and one in the Eagle Ford in South Texas, but removed three in the Permian in West Texas and eastern New Mexico. There were no changes in the Bakken in North Dakota and Montana.

On a weekly basis, the amount of U.S. oil pulled out of the ground has remained about 9.1 million bpd since the start of September, according to EIA's weekly field production report, well below the 9.6 million-barrel per day peak seen in April.

INTERNATIONAL NEWS

Conoco CEO: Lifting U.S. Oil Export Ban

By MATTHEW LEWIS, October 22, 2015

REUTERS - The head of U.S. oil company ConocoPhillips on Thursday renewed a call for the Obama administration to lift a ban on crude exports to help revive the struggling domestic energy industry, saying the move was "number one on my wish list."

The comments come amid intensifying debate in Washington on whether to reverse the 40-year-old ban, imposed after the Arab oil embargo. A Republican-sponsored bill to repeal it passed the House of Representatives last week, but faces an uncertain future after a veto threat by President Barack Obama.

"Allowing exports would ... help save existing jobs and create new jobs," Conoco's CEO, Ryan Lance, told an audience at the Boston College Chief Executives Club Luncheon in Boston, adding he believed the move would also help the economy and produce increased tax revenue.

"Now, if we could only get the administration to act. That's number one on my wish list," he said.

Texas-based ConocoPhillips bills itself as the world's biggest independent exploration and production company, with daily output of about 1.5 million barrels per day from its worldwide operations.

U.S. oil producers eager to ship oil to markets in Asia and Europe argue the ban has led to a glut of U.S. sweet crude that is choking domestic drilling. Democrats have been cool to the idea, citing concerns that exports would raise prices.

The rise of fracking technology, which involves pumping water, sand and chemicals into a well to extract oil or gas, has helped lift U.S. production of oil by 45 percent since 2010. That helped touch off the historic slide in oil prices that has forced energy companies like ConocoPhillips to slash capital budgets and cut thousands of jobs.

LEGISLATIVE NEWS

Oklahoma Regulators Take Further Action on Disposal Wells After Cushing Earthquakes

By: PAUL MONIES , October 19, 2015

NEWSOK - The Oklahoma Corporation Commission said Monday it has taken further action to limit activities of wastewater disposal wells in the Cushing area, home of the nation's largest commercial oil storage hub.

The action comes following several earthquakes in the area, including a magnitude 4.5 earthquake that hit Oct. 10. There have been no reports of damage to pipeline or storage infrastructure from that quake, one of the largest to shake the state this year. The commission's Oil and Gas Conservation Division said its latest plan calls for operational changes at 13 disposal wells in the Cushing area. Operators of another 13 disposal wells have been advised their wells may come under future limits.

Commission staff have directed Cushing-area wells injecting into the Arbuckle formation to either stop injection altogether, reduce their volumes by 25 percent or prepare for future changes. Among the disposal wells to be shut in are three from American Energy-Woodford LLC and one from Crown Energy. Nine wells are being asked to reduce their volumes, including three operated by American Energy-Woodford, three by Crown Energy, and one each by Cher Oil, Petrowarrior and FHA Investments.

The directive came in a memo sent to operators Friday. It said there have been 87 earthquakes greater than magnitude 2.5 this year within a 12-mile radius of Cushing. That's up from 29 earthquakes in that category last year and 3 in 2013.

Commission spokesman Matt Skinner said it was the first time the commission has put operators on notice of future actions. Among the 13 wells on notice are seven operated by American Energy-Woodford.

Paper raises Cushing concerns

Last month, seismologists submitted a peer-reviewed paper looking at two moderate-sized earthquakes that hit Cushing in 2014. They said a 4.0 and a 4.3 earthquake in October 2014 possibly reactivated an unmapped "strike-slip" fault. "Based on stress changes due to the 2014 Cushing sequence, and continued wastewater injection, it is reasonable to conclude that the Cushing and Wilzetta-Whitetail fault zones are critically stressed in a region sufficient enough to increase the likelihood of a large and damaging earthquake," the paper concluded.

The scientists said the industry should heed previous advice to "avoid injection into active faults and be prepared to distribute the volume across wells, and/or be prepared to abandon wells altogether in areas of unacceptable risk."

The article was submitted for publication in Geophysical Research Letters, a journal of the American Geophysical Union. Among the authors was Austin Holland, the former Oklahoma state seismologist. He has since left for a job with the U.S. Geological Survey in New Mexico.

In addition to the magnitude-4.5 earthquake in the Cushing area Oct. 10, quakes of 4.0 and 4.3 struck the area in the second half of September, according to Oklahoma Geological Survey data.

Emergency management officials and industry representatives have said the oil and gas infrastructure in the Cushing area is built to withstand moderate amounts of shaking from earthquakes. Tank storage companies and pipeline companies inspect their equipment closely after earthquakes greater than a 4.0 magnitude.

INDUSTRY ARTICLE

LEGISLATIVE NEWS (CONT.)

Commission actions

In response to ongoing concerns about the links between wastewater disposal wells and earthquakes, the Corporation Commission has put in a “traffic light” system for disposal well permits. Staff also has issued several rounds of directives to operators to either reduce disposal well depths or reduce volumes.

Oklahoma's oil and gas industry has been generally supportive of such directives, although last month a Tulsa company, Marjo Operating Co. Inc., filed an appeal against a request to reduce volumes at one of its disposal wells in Payne County. Marjo claimed the commission's voluntary directive was arbitrary and issued without due process.

Commission staff and Marjo representatives have agreed to meet before Oct. 27 to work out technical issues regarding that appeal.

The legal issues remain, however, with at least one state lawmaker planning to file legislation giving the Corporation Commission explicit authority to regulate induced seismicity risks and wastewater disposal wells.

Oklahoma Secretary of Energy and Environment Michael Teague and the Oklahoma Independent Petroleum Association said they believe the Corporation Commission, as the state's chief energy regulator, already has the legal authority to manage risks from induced seismicity.

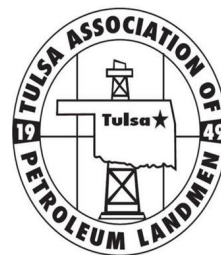

But members of the elected, three-person commission have expressed reservations about their power in recent public meetings. Chad Warmington, president of the Oklahoma Oil and Gas Association, praised the “measured approach” taken by state regulators to the risks from induced earthquakes. He said not much is known about the basement rock, the faults or the stresses upon them in the Cushing area. Much more is known about faults in the layers of rock that produce oil and natural gas.

“It's an extremely challenging situation for the Corporation Commission,” Warmington said in an email Monday. “They've had significant budget cuts coupled with unusually high seismic activity and have limited hard science to rely upon for direction. Despite these challenges, they have been vigilant in protecting the public while minimizing as best they can the significant economic impact these directives have on well operators.”

Kim Hatfield, chairman of OIPA's regulatory committee, said the organization's members believe the Corporation Commission is basing its actions on sound science. He called the complaint from Marjo an outlier. “With the swarm we've had, we think the action the commission is taking is prudent,” Hatfield said. “It's something the industry is going to cooperate on. It doesn't mean we're happy about it — we'd rather see the earthquakes go away.

“Around Cushing, it is a concern. The vast majority of seismic events are in the 2- to 3- (magnitude) range. We'd like to stand up and say for certain there's never going to be anything bigger than a 3, but we don't know, we can't say and we're not going to lie about it. The seismologists say their projections are based on naturally occurring events, but I'm not sure you can apply the same models to triggered events.”

According to Oklahoma Geological Survey data, Oklahoma has had more than 720 earthquakes greater than magnitude 3.0 this year, surpassing the 585 earthquakes in that category for all of 2014.

AAPL TOOLKIT

DEFENDING OUR INDUSTRY

As you know, our industry is constantly under fire from environmental groups in many cities & states across the country and AAPL is actively promoting and lobbying for our profession. Part of that goal is to stomp out misinformation that if left unaddressed can be very harmful to the progress of our industry. In the face of a dramatic legislative assault in Colorado, Anadarko Petroleum along with Noble Energy and others put together a short 40 page booklet or “toolkit” that explains some of the common practices of our industry and attempts to rectify some of the misinformation that exists amongst the general public that may not have the same exposure that we do to the good work that our industry is doing every day. This booklet is intended to serve as a tool to help those in-house and field landmen who are dealing with the public on a daily basis and it has been approved for wide circulation, so feel free to share it with your team. Approximately 10% of the material is Anadarko specific and the remaining 90% is factual science & economy based information that has been vetted and sourced by numerous organizations. AAPL has a similar “toolkit” and may dovetail this information into our own product and / or rebrand this and disseminate as an additional tool to the AAPL Membership, but until that time, the AAPL Board wanted to make it available to any of you who might be interested in using it in your day to day operations.

[Click Here to View the Toolkit](#)

CAREER ASSISTANCE

The oil and gas business has always been a cyclical business. During uncertain and challenging times we all could use a little help. As a reminder, TAPL has a committee to oversee the development of the Career Assistance Program (CAP). CAP's goal is to provide help for current TAPL Members who are presently unemployed and looking to regain employment by posting resumes, listing job openings, and networking. In order to fulfill our goal of ensuring that all members are gainfully employed, we need everyone's help. Before assistance can be provided, we must first be notified as to who may need assistance.

If you are currently unemployed, or know of a TAPL member that is currently seeking employment, please email your or their name and contact information to Debbie Langey, debradlangley@yahoo.com. TAPL, with permission, will also be posting resumes on the TAPL website in an effort to facilitate in the job hunt. Please send all resumes to Debbie Langey as well or you can log in and upload your resume yourself. Furthermore, CAP is currently building relationships with various employers in Tulsa in an effort to stay informed as to job openings. If you are aware of any employers seeking to fulfill land positions, please notify Brandon Ward at bward@aritulsa.com and Brad Hargrove at bhargrove@samson.com.

Please note that all information will be handled with the utmost discretion, as privacy is of great concern. You can monitor the CAP's status, event schedule, and progress on the TAPL website and newsletters, coordinated by the Benefits Director, Russ Hargrove, CPL at hargrove.russ@gmail.com. For more direct questions and concerns, contact Russ or the CAP's committee chair, Vickie Washburn, at vwashburn2@cox.net.

Sincerely,

Vickie Washburn

Career Assistance Program Chairman

HOW TO CLAIM CE CREDITS

AFFIDAVIT OF ATTENDANCE

Recertification Credits Online

After attending an event, or purchasing a video in which you get RL, RPL, CPL recertification credits you must submit your affidavit of attendance; which is done by using the code you received with purchase or at the end of the actual class.

To do so:

1. Simply login to the portal, locate the "Submit Affidavit of Attendance" link under the My CE Credits section:

A screenshot of a web portal interface. At the top, there is a header bar with a small icon and the text "My CE Credits". Below this, the text "Year-to-date Credits:" is followed by the value "0.0". Underneath, there are two bullet points: "• [Check My CE Credit / Certified Transcript](#)" and "• [Submit Affidavit of Attendance](#)".

My CE Credits	
Year-to-date Credits:	0.0
<ul style="list-style-type: none">• Check My CE Credit / Certified Transcript• Submit Affidavit of Attendance	

2. You will be asked to enter the code for the class or home study

Report Component Attendance

Select a Component

First, we need to know what component you are registering for. Enter in the code or ID number of the component.

Component ID/Code: *

3. Then you will be prompted to digitally sign that you attended the class or have reviewed the home study information.
4. Click "Finish" to confirm your credits

SPONSORSHIPS AVAILABLE

TAPL Sponsorships are a great way to advertise to our membership. We offer sponsorships for all dinners, socials, and pre-dinner cocktail hours. Each event costs \$500 and includes your company logo being featured on our website, in the newsletter, in emails about the event, as well as signage at the event.

If you're interested please contact Jessica Campbell: jcampbell@cimarex.com

Newsletter and website ads are also available at the following rates:

Website: \$650 for 12 months

Newsletter: All pricing is for 9 issues and a 50% discount is offered if you also purchase a Website Ad.

- Good: \$200 for 1/4 page ad
- Better: \$400 for 1/2 page ad
- Best: \$600 for full page ad

Thank you,
Jessica Campbell
TAPL Communications Director
