TULSA
Association of Petroleum Landmen

Letter From the President

Dear Members,

The 2016-17 TAPL year has begun, and I am honored to be serving as the President of our organization for the upcoming year. Most importantly, I am thankful to be serving on the board alongside such a diverse and experienced group that will certainly lead our organization through another successful year.

This year starts out with a flurry of events in September. We have our beginning of the year Social at the Summit on the 12th, Education Luncheon on the 22nd followed up by our Annual Skeet Shoot on the 23rd. All of these and future events would not be possible without the leadership of our current board of directors. Please join in welcoming our 2016-17 Board of Directors:

Stephen McNamara, Jr.: Past President
Michelle Farrell: Vice President
Wink Kopczynski, III: Secretary
Ryan Alonso: Treasurer
Scott Hakel: Membership Director
Michelle Linton: Communications Director
Andy Matson: Events Director
Debbie Bodenhamer: Benefits Director
Adam Dolinsky: Education Director
Shane Saunders: External Affairs Director
Jeff Myers: AAPL Director

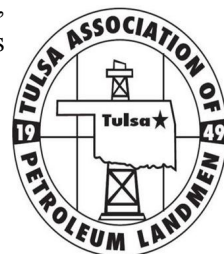

I would like to thank our previous Board of Directors on another successful year. Last year our association continued contributing to the endowment funds benefitting Energy Management scholarship recipients at both the University of Tulsa and the University of Oklahoma, were active philanthropically by donating to Toys For Tots and volunteering at the Community Food Bank.

At this time, I would like to thank our retiring board members: Mike Knapp, Harriet Robinson, Jessica Campbell, Russ Hargrove, Collin Sniff and Hamel Reinmiller. While we are losing some very valuable members of our group, I am certain that our new board will carry the torch to the same standard as the previous group.

As you can see, our association has a lot in store for our membership this month as well as the coming year. I hope everyone is as excited about these events as we are. I could not be more thankful to our volunteers and the sponsors who help make these events possible. If you are interested in becoming more involved in TAPL and its many committees, or if you have any questions, suggestions or concerns, please do not hesitate to contact me or the other members of our board. I look forward to seeing everyone on September 12th.

Sincerely,

Andrew R. Grimm

SEPTEMBER SOCIAL

THE SUMMIT CLUB

When: September 12, 2016 from 5:00 pm to 8:00 pm

Where: The Summit Club, 30th Floor, Ballroom
Bank of America Building
15 W. 6th Street

The Tulsa Association of Petroleum Landmen is pleased to welcome everyone to a new year. Our first event is a social with cocktails and appetizers for everyone to get reacquainted.

Registration Now Open!

Please Contact Michelle Farrell or Michelle Linton with questions about registration.

SEPTEMBER EDUCATIONAL LUNCHEON

THE SUMMIT CLUB

When: September 22, 2016 from 11:30 pm to 1:00 pm

Where: The Summit Club, 31st Floor

Bank of America Building

15 W. 6th Street

Speaker: John Chandler, Associate Attorney at Michael D. Stack, P.C.

Topic: "Bankruptcy and the Oklahoma Corporation Commission"
John's presentation will address the very relevant issue of how Federal bankruptcy can affect Orders issued by the OCC. John will discuss cases, federal statute, and Court of Appeal Decision that relate to this topic.

If you are in need of some CPL/RPL/RL credits, please consider attending the September 22nd Educational Luncheon. The Luncheon will be held in the Renaissance Room on the 31st floor of The Summit Club, which is a great venue not to mention great food. The cost of attendance is \$25 per person. Seating is limited, so please be sure to register early to save your spot! The buffet opens at 11:30. Please try to be through the line by 11:45 so that we may start the presentation on time.

REGISTRATION IS REQUIRED FOR THIS EVENT.

Please Contact Adam Dolinsky with any questions.

SEVENTH ANNUAL SKEET SHOOT

TULSA GUN CLUB

The Tulsa Association of Petroleum Landmen is pleased to announce its Seventh Annual Fall Fun Skeet Shoot. The event is scheduled for the afternoon of Friday, September 23rd, at the Tulsa Gun Club located at 8888 Mohawk Boulevard. This event is for members and their industry guests and associates.

THIS EVENT IS NOW FULL!

Please contact Andy Matson to be added to the wait list.

(If you have not received notice that you are on the wait list, your team entry has been accepted.)

Sponsorships are still available for this great event!

Make sure your company is recognized at this highly attended event.

Please Contact Andy Matson, Events Director at

taplskeet@gmail.com or amatson@midcon-energy.com

for further details !!!!

2016 TAPL FALL SHAMBLE

TULSA COUNTRY CLUB

The Tulsa Association of Petroleum Landmen has scheduled the 2016 TAPL Fall Shamble for Monday, October 10th at Tulsa Country Club. We are expecting the field to fill up in record time and with your help plan to host our best event yet. TAPL's fall tournament is a four-man scramble format for TAPL members ONLY. Space will be limited, so please get your sponsorship and team registrations in early.

REGISTRATION FOR THIS EVENT WILL BEGIN SOON!

Keep a lookout for the email announcing registration!

Sponsorships are available for this great event!

Make sure your company is recognized at this highly attended event.

Please Contact Denton Smith, TAPL Fall Golf Chair or

Andy Matson, Events Director at

smith@titaniumep.com or amatson@midcon-energy.com

for further details !!!!

MEMBERSHIP RENEWALS

If you have not renewed your TAPL Membership for the 2015-2016 ... THERE IS STILL TIME!

All memberships that expired as of July 1st are still currently eligible for renewal until September 28th. If you have not renewed your membership by the 29th of September your membership will automatically lapse and all access to membership benefits will cease at that time. With events like the Members Only Fall Golf tournament and our Membership Dinners quickly approaching, it is important to renew your membership as soon as possible so you will be considered in good standing for these events. After the membership renewal period expires on September 29th, anyone wishing to renew an expired membership will have to complete a new membership application.

Memberships can be renewed by logging in to the [TAPL webpage](#). Once you have successfully logged in to the website your membership page will be displayed and you will be notified that your membership has expired and you will be prompted to renew. Once you follow the renewal link you will have a chance to update you're your membership information and you be able to select a payment method for the renewal of your membership.

If you have any questions about membership renewal or with the renewal process, please contact myself or Grace Grimm (gracegrimmTAPL@gmail.com) at your convenience.

Thank you,

M. Scott Hakel, CPL
Director of Land

2016 AAPL BOARD OF DIRECTORS MEETING

ORLANDO, FLORIDA

Dear TAPL Members,

I want to pass on to you my Board Report on the last AAPL Board meeting that I attended in Orlando, Florida in June but first I wanted to thank TAPL members for giving me the opportunity to represent our Association in AAPL.

For those who may be unfamiliar with me or my landman background, I have been an AAPL member since the latter 70's, have been a TAPL member since the early 80's and have been fairly active in both over the years. I have served on the TAPL Board several times, was TAPL President in the mid 90's and have been a CPL for around 30 years. I have chaired and co-chaired several AAPL committees. As such, I have become VERY familiar with AAPL, TAPL and their relatively recent history and have represented TAPL many times at AAPL Board meetings through the years when our regular director may have not been able to attend.

If you are not an active AAPL member I can tell you from my personal experience that being a participating active member in it and TAPL can be a very rewarding endeavor, both from a work and friendship position. By being active in both Associations, I have made many work contacts that has brought me lots of work even in downturns in the industry. I have also made many good friends that also never fail me when I need to know things business-wise that I am unfamiliar with.

Before I get into my quick review of the nuts and bolts of AAPL's activities with my formal Board Report, I lastly wanted to say that if you have any questions or concerns about anything going on in AAPL, please contact me ASAP. It is my task to represent TAPL's members and share any concerns about AAPL to the Board and get the help or answers you need to move forward.

2016 AAPL BOARD OF DIRECTORS MEETING

ORLANDO, FLORIDA

The meeting convened early on Sunday morning and Marc Strahn, AAPL outgoing President gave the call to order with an Invocation by Roger Soape, Past President.

The Treasurer's Report of the various AAPL entities was given by Jay Beavers. While I could go into great detail on the income and expenses of each of the various landman entity accounts, I won't bore you with the all the detail here. Suffice it to say that if you want that, please let me know and I will send you the actual Treasurer's reports in all its 20+ pages of glory. I will just say here that in spite of the product price downturn, AAPL is doing fine and still making money.

Melanie Bell, the AAPL Executive Vice President, gave a report on all the AAPL and NAPE activities. As for a NAPE Summit 2016 "Look Back", there was \$5.123mm in net proceeds distributed to NAPE partners and \$3.102mm was AAPL's share of the net proceeds and management fee.

Marc Strahn gave us a report on his Presidential Travels and activities. Marc related that he has been everywhere in the country visiting local memberships. He has been treated incredibly well by every association. He related that everyone wants to show you their "Big ball of string" and it's a great way to see the flavor of what's been done by Landmen in our country. Since the December Board Meeting he has been to Houston, Corpus Christi, Fort Worth, Baton Rouge, Lafayette, Cheyenne, Wichita, NAPE Houston, Fort Smith, Conway, Evansville, Tulsa and Reno.

AAPL Total Membership Count (as of May 10th) is as follows:

Active Members	15,727
Associate Members	2,233
Senior Members	175
Student Members	595

Total **18,730**

Most of the rest of the meeting was a review of fairly routine committee activities with nothing that really stood out except that things were still slow but were hopefully recovering and picking up with an uptick in oil prices.

Again, if you have not been active in AAPL, please consider doing so and make plans to attend the Seattle, Washington Annual Meeting next June!

-Jeff Myers, CPL

HOW TO CLAIM CE CREDITS

AFFIDAVIT OF ATTENDANCE

Recertification Credits Online

After attending an event, or purchasing a video in which you get RL, RPL, CPL recertification credits you must submit your affidavit of attendance; which is done by using the code you received with purchase or at the end of the actual class.

To do so:

1. Simply login to the portal, locate the "Submit Affidavit of Attendance" link under the My CE Credits section:

A screenshot of a web portal interface. At the top, there is a header bar with a user icon and the text "My CE Credits". Below this, a section displays "Year-to-date Credits:" followed by the value "0.0". Underneath, there are two bullet points: "• [Check My CE Credit / Certified Transcript](#)" and "• [Submit Affidavit of Attendance](#)".

My CE Credits	
Year-to-date Credits:	0.0
<ul style="list-style-type: none">• Check My CE Credit / Certified Transcript• Submit Affidavit of Attendance	

2. You will be asked to enter the code for the class or home study

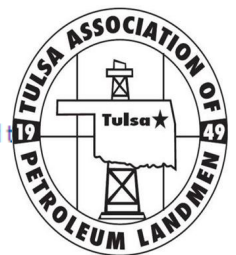

Report Component Attendance

Select a Component

First, we need to know what component you are registering for. Enter in the code or ID number of the component.

Component ID/Code: *

3. Then you will be prompted to digitally sign that you attended the class or have reviewed home study information.
4. Click "Finish" to confirm your credits

AAPL TOOLKIT

DEFENDING OUR INDUSTRY

As you know, our industry is constantly under fire from environmental groups in many cities & states across the country and AAPL is actively promoting and lobbying for our profession. Part of that goal is to stomp out misinformation that if left unaddressed can be very harmful to the progress of our industry. In the face of a dramatic legislative assault in Colorado, Anadarko Petroleum along with Noble Energy and others put together a short 40 page booklet or “toolkit” that explains some of the common practices of our industry and attempts to rectify some of the misinformation that exists amongst the general public that may not have the same exposure that we do to the good work that our industry is doing every day. This booklet is intended to serve as a tool to help those in-house and field landmen who are dealing with the public on a daily basis and it has been approved for wide circulation, so feel free to share it with your team. Approximately 10% of the material is Anadarko specific and the remaining 90% is factual science & economy based information that has been vetted and sourced by numerous organizations. AAPL has a similar “toolkit” and may dovetail this information into our own product and / or rebrand this and disseminate as an additional tool to the AAPL Membership, but until that time, the TAPL Board wanted to make it available to any of you who might be interested in using it in your day to day operations.

DOMESTIC NEWS

Apache Has High Hopes for New Oil-Field Discovery in Texas

Energy firm says overlooked 'Alpine High' area potentially holds billions of barrels of oil

By: Bradley Olson and Erin Ailworth

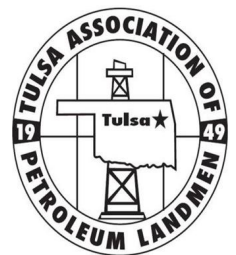

Apache Corp. said it has discovered the equivalent of at least two billion barrels of oil in a new west Texas field that has the promise to become one of the biggest energy finds of the past decade.

The discovery, which Apache is calling "Alpine High," is in an area near the Davis Mountains that had been overlooked by geologists and engineers, who believed it would be a poor fit for hydraulic fracturing. It could be worth \$8 billion by conservative estimates, or even 10 times more, according to the company. Shares rose by as much as 13% after U.S. markets opened Wednesday.

Apache started acquiring mineral rights in the area two years ago and subsequently discovered its potential. The company then quietly went about locking up more land in the field, believed to be up to 450,000 acres overall. Its position now exceeds 300,000 acres, or roughly two-thirds of the field, and is about 20 times the size of Manhattan. The company has begun drilling in the area and says the early wells, which produce more natural gas than oil, are capable of providing at least a 30% profit margin at today's prices, including all costs associated with drilling.

Some are so prolific that they can break even at a price of 10 cents per million British thermal units, according to the company. Natural gas futures closed Tuesday at \$2.72.

"This is a giant onion that is going to take us years to unveil and peel back," Apache Chief Executive John Christmann IV said in an interview. "The industry dogma about this area, all the fundamental premises that most people had about it, were just wrong."

INDUSTRY ARTICLE

DOMESTIC NEWS

Apache Has High Hopes for New Oil-Field Discovery in Texas

It remains to be seen whether Alpine High delivers on its potential; some oil and gas discoveries touted as game-changers have historically produced less than advertised. Some analysts said they were concerned about the need for infrastructure in West Texas to process and ship gas, oil and other products from the discovery.

“They are close to the Gulf Coast and to Mexico, where there will be significant demand growth, but this could be big enough that they could see price realization problems,” said R.T. Dukes, an analyst at energy consultancy Wood Mackenzie.

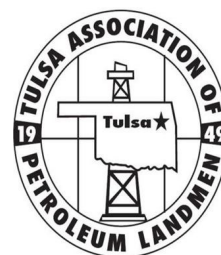

Still, the field, which Apache estimates could hold the oil-and-gas equivalent of as much as 8.1 billion barrels of oil, underscores the potential of new drilling methods to unlock vast new resources in North America.

The discovery is likely to transform Apache, currently the nation’s sixth-largest independent energy company with a market capitalization of \$20.1 billion. Alpine High may now be the biggest asset for Apache, known in the industry for its frugality and record of buying assets from other companies rather than finding its own.

The company is planning to direct one-fourth of its capital budget this year toward the field, but will require several years to ramp up production because of the need for pipelines and processing equipment. Apache has so far drilled 19 wells in the area.

The discovery of Alpine High in a previously sleepy corner of Permian Basin comes as the industry has struggled globally to find new resources, particularly oil. Other major discoveries in the past decade include Exxon Mobil Corp.’s Liza field in Guyana, which could hold as much as 1.4 billion barrels.

The new play is a short distance from extensive drilling operations and is likely to stoke the speculative fever that has recently engulfed the Permian, a vast swath of geology in West Texas and New Mexico that has been gushing oil and gas for almost 100 years. The Permian has become popular again because producers have found ways to use newer technologies to extract oil from the area at a profit, even at current below-\$50-a-barrel prices.

INDUSTRY ARTICLE

DOMESTIC NEWS

Apache Has High Hopes for New Oil-Field Discovery in Texas

On Tuesday, [EOG Resources](#) Inc. announced plans to buy Yates Petroleum Corp. for \$2.5 billion including debt to extend its holdings in the area. Private-equity firms and companies have been scooping up land in the region at a price of \$20,000 to \$30,000 an acre, even as the industry is mired in the [worst price crash in generations](#).

Apache by contrast says it bought into the new field it discovered for about \$1,300 an acre.

It may be years before the full value of the discovery shows up on Apache's balance sheet, if it does at all. In 2009, [Occidental Petroleum](#) Corp. trumpeted a new discovery in California that an analyst later said could hold as many as 10 billion barrels. The company never fully developed the resource and later spun off its [California operations](#).

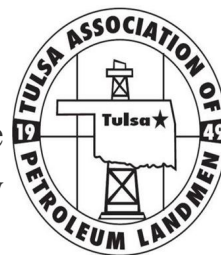

But if it holds true, Apache's discovery would be the latest oil and gas find to turn conventional geological wisdom on its head.

Although the area in question, Texas' Reeves County, is heavily drilled, most producers are focused farther north. For years, it was assumed that the layers in Alpine High would be too full of clay, which impedes hydraulic fracturing, the process of blasting sand and water into brittle rock layers to make oil and gas flow out.

Prior explorers drilled more than 110 dry holes in the area. However, a team of explorers led by Steven Keenan, whom Apache hired from EOG in 2014, studied the geology and hydrocarbons in the region of the Alpine High acreage and concluded that it might have undiscovered potential.

"Every 10 years or so, there's a so-called new discovery, and generally they confound the prevailing wisdom," said Mr. Keenan, in an interview.

Mr. Keenan was previously part of the team that helped EOG understand the potential of another new field: the Eagle Ford in South Texas. It now produces more than 1 million barrels a day.

INTERNATIONAL NEWS

Saudi minister says OPEC moving to common position on oil output changes

Reporting by Tim Kelly; Editing by Richard Pullin

REUTERS - Saudi Arabia's minister of foreign affairs said on Thursday that it would be reasonable for the kingdom to go along with other producers in changes to oil production.

Adel al-Jubeir, speaking at an event in Tokyo, said OPEC and non-OPEC oil producers were increasingly moving towards a common position.

"I think there is a move towards a common position, towards a common effort," he said. "If other producers were to agree it is reasonable to accept Saudi Arabia to go along with it."

Members of the Organization of the Petroleum Exporting Countries are due to meet informally in Algeria on the sidelines of the International Energy Forum (IEF) on Sept. 26-28, and are expected to seek to revive a global output freeze deal.

Russia is also expected to attend the IEF.

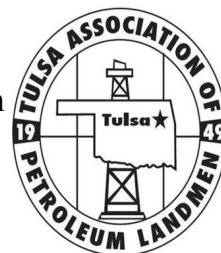

"If you want to have an impact then all of us have to shoulder the responsibility, and I believe over the past five or six months, I believe that there has been an increasing realization that this is a collective effort," Al-Jubeir said.

Iraqi Prime Minister Haider al-Abadi said this week that OPEC's second-largest producer after Saudi Arabia would support a decision to freeze oil output to prop up prices, although the country's oil minister has said it wants to continue to ramp up production.

Iran was also sending positive signals that it could support joint action to support the oil market, sources in OPEC and the oil industry told Reuters last month.

Tehran refused to join a previous attempt this year by OPEC plus non-members such as Russia to stabilize production, and talks collapsed in April.

REGULATORY NEWS

OCC to shut down Arbuckle disposal wells within 725 square-mile area of 5.6 quake

By: Crystal Price

KOCO Oklahoma City, PAWNEE, Okla. —Just hours after the 5.6-magnitude earthquake shook the state Saturday morning, the Oklahoma Corporation Commission began immediately working on a response plan to the earthquake. Members of the OCC's earthquake team began analyzing data from the Oklahoma Geological Survey to determine a plan of action.

"We are right now in the process of contacting operators in about a 500 square-mile area to shut in their disposal wells," said Matt Skinner, spokesman for the Oklahoma Corporation Commission. Skinner said there are about 40 wells in the area – but not all of them are in the Arbuckle and not all of them are active.

He said the plan is to shut down operations as quickly and safely as possible. "We don't want to make the situation worse by a sudden volume cutback. We've long been told you need to stage your cutbacks," Skinner said.

The Oklahoma Corporation Commission has been in touch with the Environmental Protection Agency regarding the disposal wells in Osage County since the OCC does not have jurisdiction over that area.

Skinner said as of right now no utilities and pipelines in the state have reported any damage from the earthquake.

The OCC released the following statement about the response plan:

The Oklahoma Corporation Commission's Oil and Gas Division (OGCD) is in the process of implementing a mandatory directive to shut down all Arbuckle disposal wells within a 725 square mile area, based on the location of the earthquake that occurred shortly after 7 a.m. on September 3, 2016 near Pawnee. The area includes 211 square miles of Osage County, which is outside of OGCD jurisdiction. OGCD is working with the Environmental Protection Agency, which has sole jurisdiction over disposal wells in Osage County. The EPA will determine what action to take in that area.

The action in the area will involved a total of 37 wells. The schedule for shut down will vary according to the well, but all wells will be shut down within 10 days. The schedule is necessary because of warnings from seismologists that a large scale, sudden shutdown could cause an earthquake."

OCC to shut down Arbuckle disposal wells within 725 square-mile area of 5.6 quake

By: Crystal Price

Gov. Mary Fallin issued a state of emergency for Pawnee County due to the earthquake.

“I’m glad to hear no one was seriously hurt in today’s earthquake and damage appears to be limited. This emergency declaration will start the process to helping individuals, families and businesses impacted by the earthquakes and serves as a precursor to requesting any necessary assistance,” Fallin said.

Members of the OCC’s earthquake team began analyzing data from the Oklahoma Geological Survey to determine a plan of action.

“We are right now in the process of contacting operators in about a 500 square-mile area to shut in their disposal wells,” said Matt Skinner, spokesman for the Oklahoma Corporation Commission.

Skinner said there are about 40 wells in the area – but not all of them are in the Arbuckle and not all of them are active.

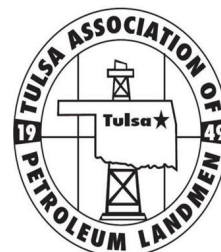

He said the plan is to shut down operations as quickly and safely as possible.

“We don’t want to make the situation worse by a sudden volume cutback. We’ve long been told you need to stage your cutbacks,” Skinner said.

The Oklahoma Corporation Commission has been in touch with the Environmental Protection Agency regarding the disposal wells in Osage County since the OCC does not have jurisdiction over that area.

Skinner said as of right now no utilities and pipelines in the state have reported any damage from the earthquake.

CAREER ASSISTANCE

As we all know, the oil and gas industry is still in a down cycle however there are jobs to be had and TAPL wants to help landmen and prospective companies with this process. Currently our job board is bare and we want to fill it up! TAPL, and the Career Assistance Committee is in the process of revamping this area and would like your feedback. We are working on a new approach in making the process anonymous and would like your feedback.

If you have thoughts or concerns you would like to communicate regarding past experience or future ideas, please email Debbie Bodenhamer, Benefits Coordinator at dbodenhamer@rimrockresource.com

Thank you and look forward to your input!
